CNK Bearing Company Brief

CNK Bearing Co. Ltd. was established in 1998, it is a private enterprise which specializes in manufacturing wheel hub bearings, automobile steering bearings, air condition bearings and all kinds of non-standard ball bearing. The annual production capacity is up to 3 million sets. And our products are mainly exported to Europe, Africa, Southeast Asia, etc.

Our company boasts of powerful technique developing ability advanced technology and perfect equipment of quality tests. 'CNK' brand bearings are widely used in various fields such as electric tool, motor, textile apparatus, instrument, medical equipment, etc.

Bearing the notion of high-quality and sincerity, our company has good business relationship with all our customers, with our high quality, reasonable price, short lead time and good credit standing.

We warmly welcome all our customers, old and new, in and abroad, with our most

INDEX

S. NO.	BEARING NAME	PAGE NO.
1	FRONT WHEEL BEARING	1-4
2	REAR WHEEL BEARING	5-9
3	TIMING TENSIONER	10-13
4	AIR CONDITIONER	14
5	CLUTCH BEARING	14-17
6	IDLER PULLEY BEARING	18-20
7	CRANK PULLEY	20-22
8	ALTERNATOR BEARING	22
9	TAPPER ROLLER BEARING	23-25
10	CENTER BEARING WITH ASSY.	25
11	BALL BEARING	25-27
12	STEERING BEARING	28
13	SELF BRG./GEAR BOX NEEDLE	28-29
14	ALTERNATOR PULLEY BEARING	30-31
15	WATER PUMP PULLEY	31

Do's and Don'ts of Bearing Usage

Do's

1. Ensure that mounting takes place in a clean and dust free environment.
2. Select the correct and proper tools for mounting.
3. Check housing bore and shaft diameter for burrs and damages.
4. Select the correct fit for the bearing on shaft and housing.
5. Clean the bearing with white spirit only if contaminated with foreign matter.
6. Clean all related components thoroughly with a lint free cloth.
7. Lubricate rolling bearings with good quality and adequate quantity of grease.

Don't's

1. Remove bearings from the carton until ready for mounting.
2. Wash the new bearings.
3. Use worn out tools.
4. Apply Mounting force through rolling elements.
5. Use cotton waste/cloth cuttings for cleaning bearings and related components.
6. Use grease container without lid.
7. Fill too much grease in the bearings.
8. Heat the bearings in a naked flame.
9. Expose bearings to atmospheric condition in case of incomplete job.
10. Hammer the bearings to remove from the shaft.
